Whereas, trees provide wood products, wildlife habitat, erosion control, clean the air, produce oxygen, and help to lower heating and cooling costs, and

Whereas, trees enhance our business areas and beautify our communities, and

Whereas, Auburn has been recognized as a Tree City USA for 39 years since the program's implementation and desires to continue its tree planting practices,

Now Therefore, I, Scott Kudrna, Mayor of the City of Auburn, Nebraska do hereby proclaim April 29, 2016 as

WHEREAS, vigorous local efforts to combat discrimination can be as effective, if not more so, than Federal efforts; and

SUBJECT: U.S. Nuclear Regulatory Presentation at the May 9, 2016, Auburn City Council Meeting

Dear Ms. Heskett:

I am the U.S. Nuclear Regulatory Commission (NRC) Senior Resident Inspector based at the Cooper Nuclear Station in Brownville, NE. I would like to formally request that we be added to the Agenda for the May 9, 2016, Auburn City Council Meeting. I would like to be allotted approximately 15 minutes, if possible, to make a presentation for those at the meeting, to share information regarding the NRC and the Cooper Nuclear Station. I plan to discuss the function of the NRC, our role as NRC Resident Inspectors, and the results of the NRC's assessment of Cooper plant performance in 2015. I would like to make a PowerPoint presentation, if you can logistically support it.

On February 17, 2016, the NRC completed its end-of-cycle performance review of the Cooper Nuclear Station. The NRC reviewed the most recent quarterly performance indicators (PIs) in addition to inspection results and enforcement actions from January 1, 2015 through December 31, 2015.

The NRC determined that overall, the Cooper Nuclear Station operated in a manner that preserved public health and safety and met all cornerstone objectives. The NRC determined the performance at the Cooper Nuclear Station during the most recent quarter was within the Licensee Response Column (Column 1) of the NRC's Reactor Oversight Process (ROP) Action Matrix because all inspection findings had very low (i.e., green) safety significance, and all PIs indicated that plant performance was within the nominal, expected range (i.e., green). Therefore, the NRC plans to conduct ROP baseline inspections at this facility.

Please let me know if you have questions. I can be reached during business hours at 402-825-3371.

Sincerely,

Tricia Voss
NRC Senior Resident Inspector
Cooper Nuclear Station
